Dear Hiring Manager

I am writing to express my interest in the Software Developer intern position . As a third-year Computer Science student at Heritage Institute of Technology, I have developed a strong foundation in backend development and am proficient in the MERN stack. My passion for creating scalable and efficient applications has driven me to undertake several projects that mirror real-world challenges.

One of my notable projects is a real-time chat application built with React, Node.js, Express, and MongoDB, incorporating Socket.IO for live message updates. This project not only enhanced my technical skills but also taught me the importance of user-centric design and real-time data handling. Additionally, I developed a dynamic blog platform featuring user authentication, image uploads, and a commenting system, further solidifying my expertise in full-stack development.

Beyond my academic pursuits, I have a strong inclination towards problem-solving, evidenced by solving over 500 problems across various platforms, including 300+ on LeetCode. My participation in competitive programming has honed my analytical skills, with a LeetCode max rating of 1511 and a Codeforces rating of 1002.

I am eager to bring my technical skills and enthusiasm to this company and contribute to your innovative projects. I would welcome the opportunity to discuss how my background aligns with your team's goals.

Sincerely,

Tanmoy Majee
